

# Ideation Phase

## Brainstorm & Idea Prioritization Template

Date	19 September 2022
Team ID	PNT2022TMID40835
Project Name	University Admit Eligibility Predictor
Maximum Marks	4 Marks

### Step-1: Team Gathering, Collaboration and Select the Problem Statement

## Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

 10 minutes to prepare  
 1 hour to collaborate  
 2-8 people recommended

 **Before you collaborate**

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

 10 minutes

---

**A Team gathering**  
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

**B Set the goal**  
Think about the problem you'll be focusing on solving in the brainstorming session.

**C Learn how to use the facilitation tools**  
Use the Facilitation Superpowers to run a happy and productive session.

**1**

**Define your problem statement**

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

 5 minutes

---

**PROBLEM**

How might we [your problem statement]?

### Key rules of brainstorming

To run an smooth and productive session

 Stay in topic.

 Encourage wild ideas.

 Defer judgment.

 Listen to others.

 Go for volume.

 If possible, be visual.

### Step-2: Brainstorm, Idea Listing and Grouping

2

## Brainstorm

Write down any ideas that comes to mind that address your problem Statement

🕒 10 minutes

Balaji.M

Watch tutorials learn ml	required virtualization tools	fast prediction ml predictor
provide : user login, my library etc	add details on how we predict	rebuild from existing solutions

Muthuvel.S

let's learn most used ML and AI algo	let's learn most used Data visualization	provide service like "within budget universities"
add college recommendation system	deploy using cloud-fast and scalable	

Rameshkannan.P

collect new data's from users and implement a model	build new predictive model with accuracy	analyze existing esp:web services of such predictors
present results in understandable visual	for students thinking to take University provide guide how to select uni.?	

Krishnapriya.S

learn web dev and frameworks	add location based predictions too	provide necessary links to recommended colleges
provide "stop" editor	provide web service with prediction for both students and learners	

3

### Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.
